About Me

Engineering student in Artificial Intelligence with a strong background in mathematics and a deep interest in theoretical and mathematical research. Main academic interest in **optimization theory** and its applications in machine learning, with the long-term goal of conducting research at the frontier of mathematics and AI.

Actively involved in national and international mathematics competitions, with experience coaching more than 500 students in Algeria and internationally.

Areas of Interest

Mathematical optimization (convex and non-convex), theoretical machine learning, stochastic optimization, computational complexity, and theoretical foundations of deep learning.

Education

2024–present Algiers, Algeria
Engineering Degree in Artificial Intelligence
National Higher School of Artificial Intelligence (ENSIA)
Ranked in category A; top 10% (first 27) based on annual average.

2021–2024 Algeria
Baccalaureate – Mathematics Track
High School
Obtained with “excellent” honors (average: 18+/20).

Olympiad Distinctions

IMC 2025 Bronze Medal, International Mathematical Competition for University Students, Bulgaria

IMO 2024 Honorable Mention (2 points from bronze), International Mathematical Olympiad, UK

OFM 2024 Silver Medal (1 point from gold), Francophone Mathematical Olympiad

IMO 2023 Honorable Mention, International Mathematical Olympiad, Japan

PAMO 2024 Gold Medal, Pan-African Mathematical Olympiad, South Africa

IGO 2024 Silver Medal, Iranian Geometry Olympiad, Online (Iran)

OFMJ 2023 Silver Medal, Francophone Junior Mathematical Olympiad

EMC 2023 Honorable Mention, European Mathematics Cup

IGO 2023 Honorable Mention, Iranian Geometry Olympiad

Conferences & Academic Schools

2025–2026 MathWin 2025–2026 Educational Program.

March 2026 Sixth edition of MathCamp – intensive mathematics training through advanced courses and lectures, including partial differential equations, dynamical systems, Fourier analysis, random walks, quantum mechanics, differential geometry, and topology.

Experience

Aug.–Sep. 2026 Algeria
Intern – Networking and Data Storage
SARL El ORABI System

- Professional internship in networking and data storage.
- Hands-on configuration and administration of network infrastructure: switches, VLANs, DHCP, OSPF, IP, and firewalls.
- Installation and configuration of servers and virtualization environments with Proxmox.
- Use of Huawei networking hardware and solutions in a professional environment.

Volunteering

Aug. 2026–present Algeria
Director General of Organizers
Algerian Mathematical Olympiad (AMO)

- Overall direction and supervision of the entire AMO organizing team.
- Strategic coordination of academic, logistical, and operational activities on a national scale.
- Decision-making authority over competition organization, team selection, and international representation.

2024–2026 Algeria
Coach & Organizer
Algerian Mathematical Olympiad (AMO)

- Coached more than 500 high school students for national and international mathematics competitions.
- Led academic and logistical organization of the ALMO 2025 finals (200+ participants), including problem selection and grading/inspection.
- Head of the Algerian delegation to the Iranian Geometry Olympiad (IGO 2025).
- Deputy leader of the Algerian team at the Francophone Mathematical Olympiad (OFM 2025).
- Observer and coordinator of the Algerian delegation at the International Mathematical Olympiad (IMO 2025).
- Observer A of the Algerian delegation at the Balkan Mathematical Olympiad (BMO 2026).
- Observer A of the Algerian delegation at the International Mathematical Olympiad (IMO 2026).
- Led test and TST development for over a year; subsequently appointed head coach for 5 months.
- Remote coordinator for the Pan-African Mathematical Olympiad, responsible for rigorous grading and coordination of papers from multiple African delegations.

2024–2025 Algeria
Coach
Algerian Informatics Olympiad (AOI)

- Coached more than 50 students in algorithms, data structures, and problem-solving techniques.
- Coordinated selection tests and training camps, including problem creation.

2025–present Remote (Rwanda)
Lecturer / Trainer
African Olympiad Academy (AOA)

- Delivered online courses in mathematics and computer science for students from more than 10 African countries as part of the Rising Stars program.

Projects, Open Source & Research

Founder & Community Manager – BAC World

2024–2026

Created and developed an academic community of more than 1,000 students preparing for the Algerian baccalaureate. Managed and coordinated a team of student-teachers and contributors. Contributed to the success of numerous students who achieved averages above 18/20, including students among the top national rankings.

Organizer – Academic Horizon Hub

2024–2026

Co-managed a platform of more than 1,000 members offering academic opportunities and mentoring; collaborated with BAC World to extend the initiative's impact.

Administrator & Developer – AMO Discord

2026

Administered and developed the Discord infrastructure of the Algerian Mathematical Olympiad Organization. Developed dedicated bots to automate thread creation, role assignment, and generation of introduction messages tailored to each channel's content.

Developer – AMO Testing Platform

2026

Designed and developed a web platform for managing and evaluating mathematical olympiad problems using React and Node.js/Express. Automated evaluation scoring and vote weighting based on evaluator profiles, with structured data storage in a database. Project completed, currently not publicly deployed.

Founder & Developer – ADNMission

2026–present

Designed and developed an interactive geography game centered on exploring the Earth. Developed features around countries, flags, mountains, rivers, seas, oceans, tectonic plates, and volcanoes, with planned extension to animal and plant species. Developed three complementary modes: Exploration, Game, and Learning; Learning mode under active development.

Geometry Research – Configuration Spaces in Normed Spaces

2026–present

Research work under the supervision of Ghani Zeghib (CNRS Research Director, ENS Lyon), in collaboration with Mohamed Amir BenMelouka and Haithem Idris Ait Hamadouche. Study of geometric and topological structures associated with configuration spaces and their properties within normed spaces.

Other Activities

- Committed to fitness and well-being through regular gym training twice a week.
- Self-taught study of physical geography and geology, with an interest in earth systems, spatial analysis, and environmental processes.

Technical Skills

Programming & Web: Python, C++, Java, JavaScript, HTML5, CSS3, React, Node.js, Express

Scientific Tools, Data & Systems: NumPy, Pandas, Regular Expressions, MySQL, MongoDB, Git, LaTeX, Proxmox, MobaXterm

Networking & Infrastructure: IP, VLAN, DHCP, SSH and OSPF network configuration; switch, firewall, router and server configuration and administration; deployment of systems and virtualized environments with Proxmox.

Languages

Arabic: Native language

English: Fluent

French: Advanced
